- Disinfectant Wet Wipes

EA Medical

Exhibit Arts, LLC (EA), a Woman-Owned Small Business (WOSB) with headquarters in Wichita, KS is committed to working with our friends and neighbors in Kansas to prevent the spread of the COVID-19 virus in order to safely return our children to the classroom and to stimulate economic growth and recovery for every resident of Kansas.

EA has over 20 years of experience in providing procurement services. During 2020, Exhibit Arts has worked closely with state agencies, colleges, and universities to meet their needs for Personal Protective Equipment (PPE). For example, the Kansas Department of Health and Environment (KDHE) placed an order with EA for 1 million masks, which we successfully fulfilled. The University of Kansas Medical Center (KUMED) Wichita Campus purchased a large quantity of KN95 masks from EA. KU MED Wichita routinely utilizes our in-house customization services to obtain personalized scrubs, lab coats, and other customized apparel.

We are confident that we can provide the critical supplies and services that are needed to fight off the COVID-19 pandemic by public agencies as well as related institutions and those enterprises that are forced to continue to work despite the virus situation.

With a vast network of domestic and international providers as well as our established transportation system (including our own charter flights as well as Fast Ships from South East Asia), we are sourcing and importing the highly needed PPE items to help federal and state/local agencies as well as large enterprises in their fight against the pandemic. Having an established procurement system in place, we provide an extremely fast delivery system for all bulk health related equipment and can extend this service to any public entity (federal, state and local).

We look forward to working with your organization and believe that we provide the services and knowledge that can alleviate the needs of your organization and provide the needed support to our front line “war fighters” during these hard times.

Masks

N95 Face Mask

SKU:	GD-MS5
MOQ:	250
Packaging:	100 per box
Certification:	FDA / CE EN149
Description:	The N95 respirator is a particle-filtering respirator with a filter efficiency $\geq 95\%$. The special feature of the mask is its innovative three-part design. This means that the chin area of the mask as well as the upper part (including the nose bridge) are folded out before use. This not only makes it easier to transport and store the respirator, but also increases wearing comfort. Due to this innovative design, the mask adapts perfectly to the shape of your face and also ensures a secure hold during facial movements.

KN95 Face Mask

SKU:	GD-MS2
MOQ:	250
